

## We are going circular!

Wiegerinck has signed the BNA We're Going Circular manifesto. Our endorsement is based on the conviction that humankind is inextricably linked to nature. Humans need nature. When we disrupt the natural balance, we not only undermine our own existence, but also that of our descendants and others. This awareness calls for humility and respect. Nature is the basis for all life and must not be violated.

Architects are responsible for helping to create a healthier world, and we are committed to doing everything within our sphere of influence to increase the quality of all life on earth. In doing so, we draw inspiration from the intelligence and beauty of nature. Circular building comes as a natural result.

We've already taken a number of steps to date by designing BREEAM Excellent certified buildings, such as the [Plus Ultra research centre](#) in Wageningen, the [Van der Valk Hotel Nijmegen-Lent](#) and the [Amsterdam UMC Imaging Center](#).

We realise that none of this is enough, but we need help: we can't build alone. Together with our clients, consultants and the industry, we're contributing to an inspiring, creative, social, healthy and fully circular environment.
